Steve,

I wanted to send a note regarding the building we purchased from Rapid Set Buildings to facilitate our Safety Catwalk Project at Suncor's Grand Junction Products Terminal.

The building has gone up without problems, as advertised, and I would especially like to thank you for the excellent service you provided regarding numerous field questions and attention to delivery time schedules. You delivered a great building on time and on budget.

I would especially like to commend you for handling the last minute changes, required by our side, to accommodate the third party catwalk structure issues. The fact you showed up on site after delivering prints for the building we originally thought we needed, and that you were capable of changing the entire building that day was amazing. In addition, the eight point loads to all rigid frames requirement as confirmed by the catwalk manufacturer, on a new building size was immediately addressed and resolved. Prints were updated and delivered in 2 days. We feared a total re-do of the project would be necessary, but your help got us through without delay and rework.

Again, thank you for all the hard work in helping get this project completed. A great product combined with great service is hard to find these days. We will definitely use Rapid Set Buildings when future projects arise.

Kind Regards,
Douglas Pumphrey
